**Polywater® FST™ NEC Codes**

**FOAM DUCT SEALANT**

**Meets and Exceeds NEC Codes for Raceway Seals**

**Polywater® FST™ Foam Duct Sealant** meets and exceeds the NEC code requirements; 2017 NEC Articles 225.27, 230.8, 300.5 (G), 300.7 (a) on Raceway Seals, and 501.15 (B) (2). FST is superior to both duct putty and aerosol cans of foam because it has been tested for cable compatibility.

- **NEC 225.27 Raceway Seal.** Where a raceway enters a building or structure from outside, it shall be sealed. Spare or unused raceways shall also be sealed. Sealants shall be identified for use with cable insulation, conductor insulation, bare conductor, shield, or other components.

- **NEC 230.8 Raceway Seal.** Where a service raceway enters a building or structure from an underground distribution system, it shall be sealed in accordance with 300.5(G). Spare or unused raceways shall also be sealed. Sealants shall be identified for use with the cable insulation, shield, or other components.

- **NEC 300.5 (G) Raceway Seals.** Conduits or raceways through which moisture may contact live parts shall be sealed or plugged at either or both ends. Spare or unused raceways shall also be sealed. Sealants shall be identified for use with the cable insulation, conductor insulation, bare conductor, shield, or other components.

  **Informational Note:** Presence of hazardous gases or vapors may also necessitate sealing of underground conduits or raceways entering buildings.

- **NEC 501.15 (B)(2) Conduit Seals, Class 1 Division 2:** A conduit seal shall be required in each conduit run leaving a Class 1, Division 2 location... and it shall be designed and installed to minimize the amount of gas or vapor within the portion of the conduit installed in the Division 2 location... Such seals shall not be required to be explosion proof...”

* As always with the NEC code it is prudent to check with and get approval from the AHJ before installing any product in a hazardous location area due to varying interpretations.
